

Welcome to Year 5!

Willow Class

Topic

Our topic this term is 'Ain't No Mountain High Enough.' We will be learning about the structure of the Earth, mountain formations, the water cycle and much, much more! We look forward to learning more about the journey of a river and presenting our findings in a creative way!

Science

Our focus in science this term will be Animals Including Humans and Thinking Scientifically. We will have the opportunity to plan and carry out a number of scientific investigations and nurture our own 'Flour Babies!'

Maths

In maths we will be focussing on using different methods for multiplication and division, converting between different units of measure and revising all other Year 5 maths objectives.

Literacy

This term we will be using an extract from 'Fly Me Home' by Polly Ho-Yen—a text that we will be reading as a class during our shared reading sessions.

Later this term, we will be writing our own persuasion text about visiting the Amazon River!

Homework will be assigned every **Thursday** and will be due in on the following **Monday**. Reading and spelling also form an important part of homework; both of which should be practised daily.

PE kits and **water bottles** should be in school every week. PE will take place every **Monday**.
