

Year 1

Literacy

In literacy we are learning the story of The Little Red Hen. When the children know the story, they will innovate it to make their own version. The children will use the punctuation and phonics they have learnt so far to create their story.

Science

We have a very exciting term in science this term. We will start the term with an incubator full of eggs. The children will watch as the eggs hatch, making observations in their egg dairies. We will discuss what the chicks need to live and thrive and say goodbye to them after a fortnight.

We will also be studying Mini Beasts, asking questions, making predictions and observations. The children will have a wonderful opportunity at forest school to see mini beasts in their natural habitat and will learn about mini beast habitats from all over the world. We will visit the Natural History Museum to learn form the experts.

As well as mini beasts we will be planting seeds and learning the main parts of a flowering plant.

RE

In RE we will be finding out about Judaism.

Maths

This term the children will learn to sort objects into groups to help them begin to learn the 2 times table. They will begin to learn to tell the time, starting with O'clock, half past, quarter to and quarter past. They will also use what they have learnt in maths to solve problems.

Don't forget that we have wealth of information available to us on our door step. If you want to find out more about minibeast with your child, why not visit the library. Remember, we like you to read every evening with your child.

Reading is the best way to increase your child's vocabulary and you can learn such a lot in the process.
