

Maths continues to build on the children's skills from last term. They will strengthen their mental maths and begin to apply their knowledge in different situations. You can help your child by practising what they have learnt at home and by making sure they know their doubles, halves and times tables (2, 3, 5 and 10).

We will be learning about **DINOSAURS!** We will discover lots of information through research (ICT and literacy), science (food chains, habitats and diets) and fossil investigation (art and science)!

In PE the children will be learning about dance with Miss Turner. They will also be practising PE skills in team games.

DINOSAURS

Year Two

In Literacy this term we are looking at the stories of Mary Anning (the fossil girl) and Tyrannosaurus Drip. The children will also strengthen their spelling, grammar and punctuation skills. You can help your child by discussing their learning and spotting/discussing these things at home.
