

St Christopher's Primary School

Vision and Principles

- At St Christopher's we aim to offer a challenging and
- engaging Design and Technology curriculum, which is
- consolidated across all aspects of our curriculum, relating
- to real life opportunities to design and make real
- products. Using creativity and imagination, pupils design
- and make products that solve real and relevant problems,
- within a variety of contexts, considering their own and
- others' needs, wants and values. We follow a 'Design,
- Make, Evaluate' approach to the teaching and learning of
- DT.

Our DT teaching and learning is good when:

We develop creative, technical and practical skills

We use our skills to design and make high-quality prototypes and products for a wide range of users

We critique, evaluate and test our ideas and products

We understand and apply the principles of nutrition and learn how to cook.

We develop life skills as well as both social and cultural experiences
